PROFILE

Front-End Developer & Web Designer. I create websites for small businesses and creators that are fast, look great on all devices, and are easy for your customers to use.
I'm also a Software Engineering student, always learning new tools and ways to build better websites.

WORK EXPERIENCE

Front-End Developer & Web Designer 2025 - PRESENT
Freelance

- Built fast, clean, and fully responsive websites for small businesses and creators using HTML, Tailwind CSS, and JavaScript.
- Optimized web page loading speed and layout performance to deliver smooth user experiences across mobile and desktop devices.
- Used modern tools like VS Code Copilot, Git, and GitHub for quick deployment and site maintenance.

LiveHandle UI Architecture 2026--PRESENT
Web Developer (Personal Project)

- Replicated the full front-end architecture and toolset of LiveHandle, including analytical tool pages and video downloaders.
- Focused on precise UI replica design, fine-tuning spacing, typography, and clean layouts.
- Implemented custom Tailwind CSS utility classes and background animations to enhance visual appeal.

Online Quiz System 2026 -PRESENT
Front-End Developer (Academic Project)

- Developed a responsive and interactive online quiz platform targeted at competitive entrance exams.
- Built the user interface using clean HTML, Tailwind CSS, and JavaScript for seamless cross-device performance.
- Managed database integration using Supabase and successfully deployed the live application via Vercel.
